Outline

1. Network Architecture
2. Create LineBot Account
3. Verify Your LineBot Application (Webhook)

1. Network Architecture

LineBot Application Network Architecture

Normally, the network architecture of the LineBot application is

To activate a web server with HTTPS service, several things are required:

1. a server
2. a domain name
3. a SSL certificate

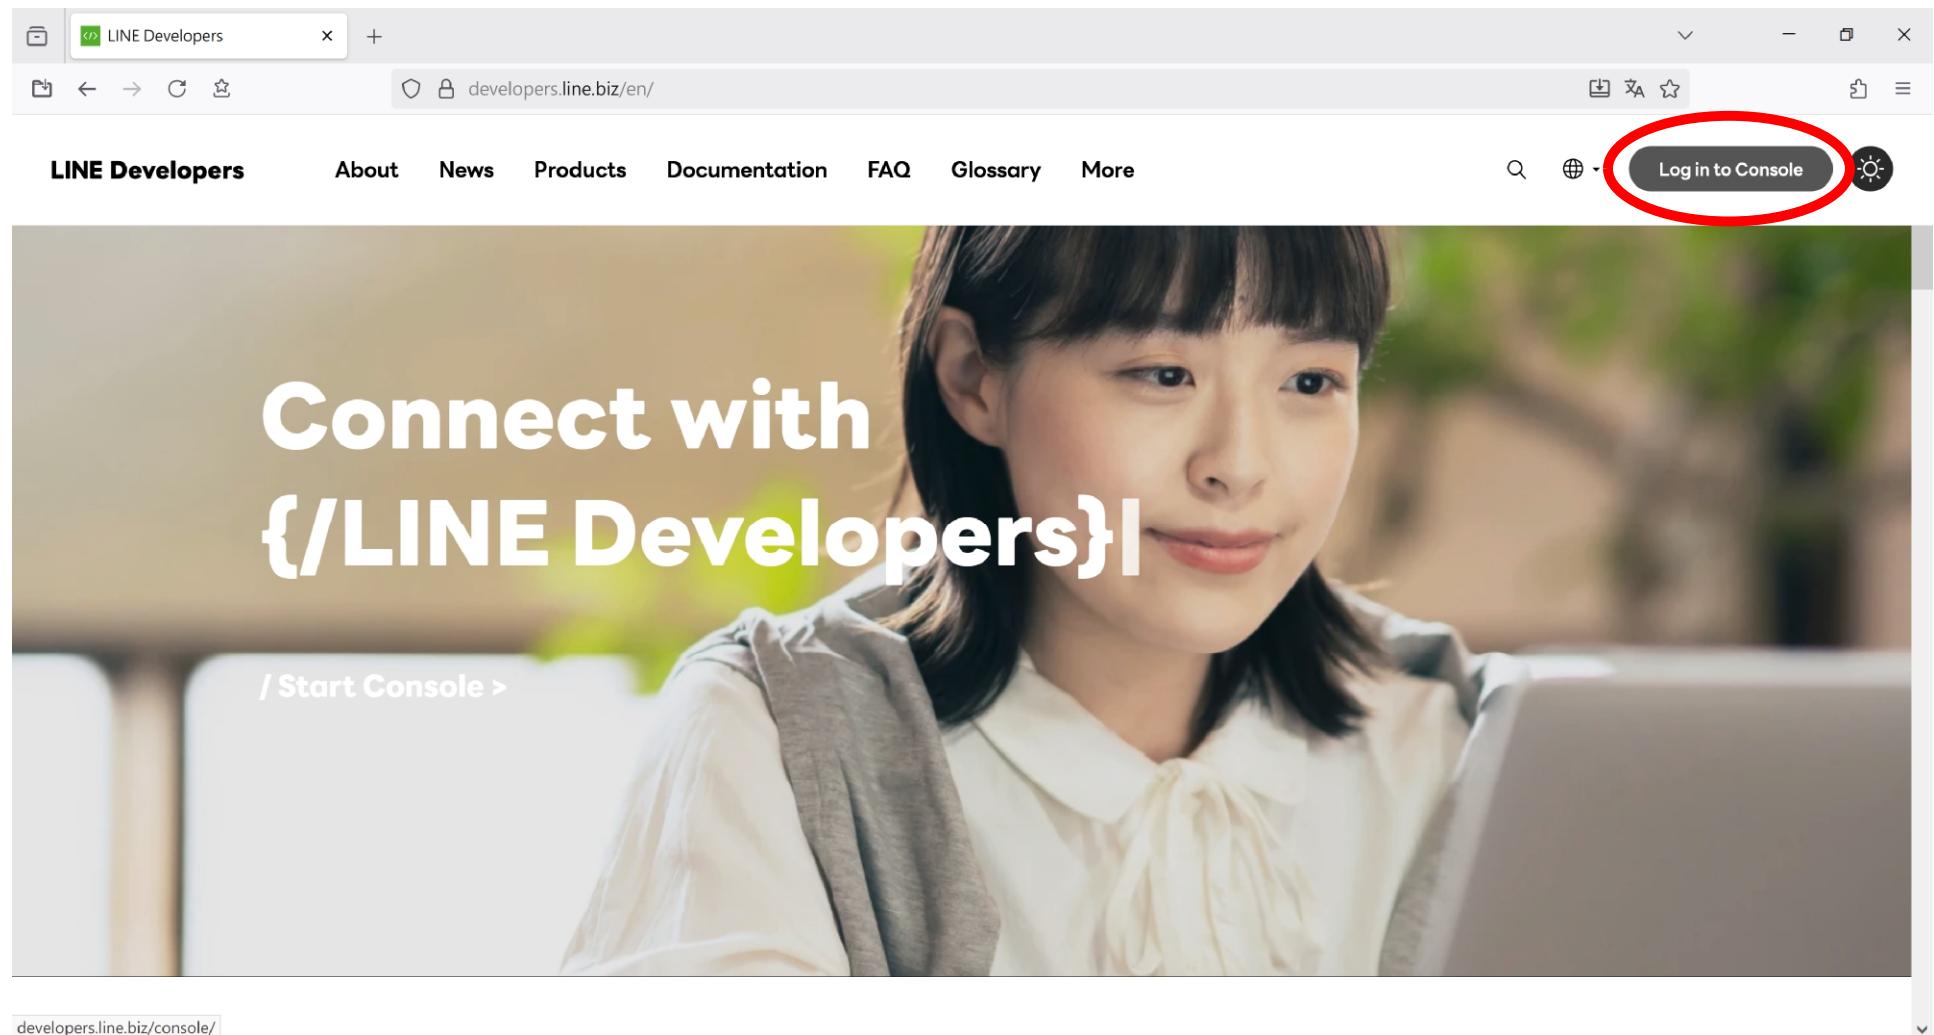

To simplify the process in the class, we use [ngrok](#) instead of a https web server.

2. Create LineBot Account

Apply a LINE developer account

The screenshot shows a web browser window for the LINE Developers console at developers.line.biz/console/?status=success. The main navigation bar includes links for About, News, Products, Documentation, FAQ, Glossary, and More. A sidebar on the left provides access to Console home, Providers (with a search bar), Admin (Security), Tools, and Support. The main content area displays a list of providers under 'Providers (1)'. A modal dialog box titled 'Create a new provider' is open, prompting for a 'Provider name' (input field contains 'CLASS_demo'). Below the input field are three validation rules: 'Don't leave this empty', 'Don't use special characters (4-byte Unicode)', and 'Enter no more than 100 characters'. A descriptive note states: 'A provider is an individual developer, company, or organization that provides services. For more details, see the [documentation](#)'. At the bottom of the dialog are 'Cancel' and 'Create' buttons. The status bar at the bottom of the page includes links for About LINE Developers site, Terms and policies, About trademarks, Bug report form, Family Sites, and a search icon.

Create a Messaging API channel

It's no longer possible to create Messaging API channels directly from the LINE Developers Console.

To create a Messaging API channel, create a LINE Official Account using the Create a LINE Official Account button below, and then enable the use of the Messaging API on the LINE Official Account Manager.

For more information, see [Get started with the Messaging API](#) in the Messaging API documentation.

Providers (2) Create

The screenshot shows the LINE Developers console interface. On the left, there's a sidebar with links for Console home, Providers (which is expanded), Admin, CLASS_demo (circled in red), Security, Tools, and Support. The main content area displays 'Recently visited channels' with a card for 'Class_demo' which is marked as 'New Admin' and integrates with the 'Messaging API'. Below this, there's a 'Providers (2)' section with a 'Create' button.

The screenshot shows the LINE Developers console interface. The top navigation bar has three tabs: 'LINE Developers' (active), 'LINE Official Account Manager' (inactive), and another 'LINE Developers' tab. The URL in the address bar is developers.line.biz/console/provider/2004573733. The main header includes 'LINE Developers' logo, a search bar, and navigation links: About, News, Products, Documentation, FAQ, Glossary, More, and a user profile icon.

The left sidebar contains sections: 'Console home', 'Providers' (selected, indicated by a green arrow), 'Search...', 'Admin' (selected), 'CLASS_demo' (highlighted in green), 'Security', 'Tools', and 'Support'.

The right main area shows the 'CLASS_demo' provider details. The breadcrumb navigation is 'TOP > CLASS_demo'. Below it, there are tabs: 'Channels' (selected), 'Roles', and 'Settings'. A checkbox 'Group by role' is checked, and a dropdown 'Sort by date' is set to 'Sort by date'. There is a large red circle highlighting the channel name 'Class_demo'.

The screenshot shows two overlapping browser windows of the LINE Developers console. The top window displays the 'Basic settings' tab for a channel named 'Class_demo'. A red circle highlights the 'Basic settings' tab. The bottom window shows the 'Permissions' section of the same channel configuration. A large red circle highlights the 'Channel secret' field, which contains the value '16c65591 [REDACTED] 801719d'. A red box with the text 'Note down the Channel secret' is overlaid on the bottom window.

Screenshot of the LINE Developers console showing the Messaging API settings for a bot named "Class_demo".

The screenshot shows three browser tabs open:

- LINE Developers
- LINE Official Account Manager
- LINE Developers (active tab)

The URL in the address bar is developers.line.biz/console/channel/2008249479/messaging-api.

The main navigation menu includes: About, News, Products, Documentation, FAQ, Glossary, More, and a user profile icon.

The left sidebar shows the following sections:

- Console home
- Providers (selected)
- Search...
- Admin
- CLASS_demo
- Security
- Tools
- Support

The "Messaging API" tab is highlighted with a red oval.

The "Messaging API settings" section contains:

- Bot information**: Bot basic ID: @948ejayh
- QR code**: A QR code is displayed, which is circled with a large red oval.

A callout box labeled "The LineBot QR code" points to the QR code area.

The screenshot shows a web browser window with three tabs open, all titled "LINE Developers". The active tab is showing the "Messaging API" settings for a channel named "Class_demo".

The URL in the address bar is `developers.line.biz/console/channel/2008249479/messaging-api`.

The page header includes links for "About", "News", "Products", "Documentation", "FAQ", "Glossary", and "More". On the right side, there are user profile and notification icons.

The main content area has a breadcrumb navigation: "TOP > CLASS_demo > Class_demo > **Messaging API**". A note below the breadcrumb says: "Edit the message type and other settings for these features in the LINE Official Account Manager."

The settings listed are:

- Allow bot to join group chats**: Status: Disabled, Edit link
- Auto-reply messages**: Status: Enabled, Edit link
- Greeting messages**: Status: Enabled, Edit link

Channel access token

Channel access token (long-lived) (with a question mark icon):

Note down the Channel access token

3. Verify Your LineBot Application

Webhook with Line Server

Verify LineBot Application through ngrok

Using **ngrok** instead of a https web server to webhook with Line server.

Prepare the required files and install required Python modules.

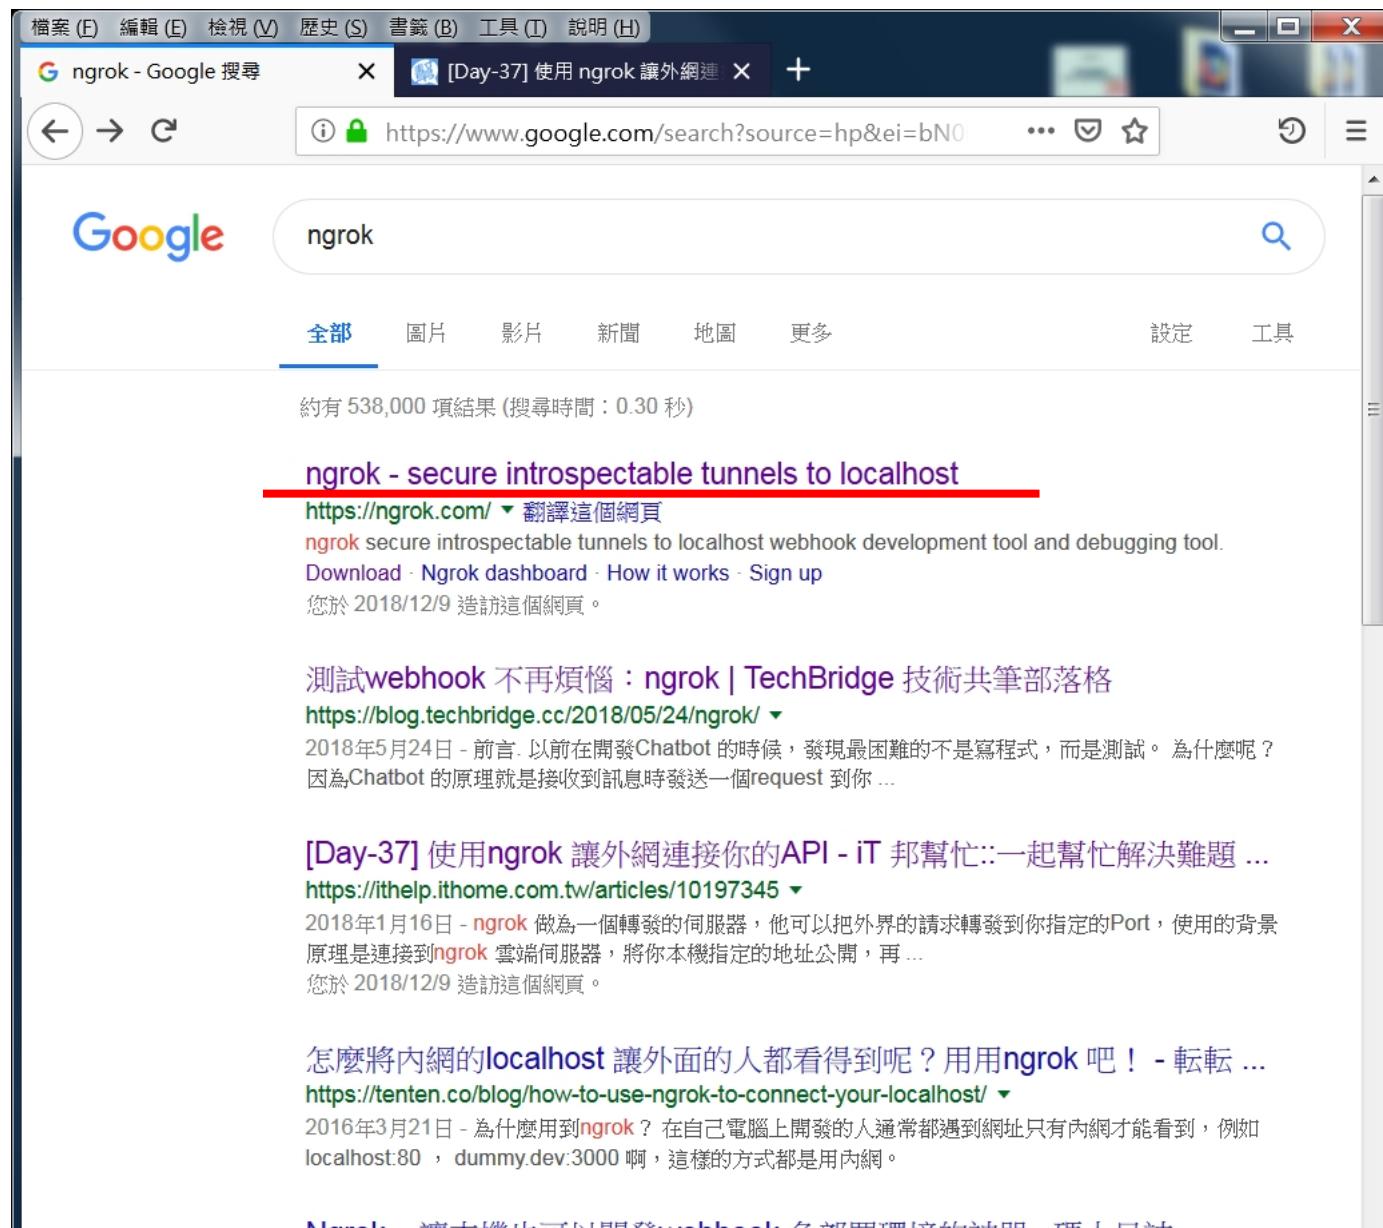

The screenshot shows a GitHub repository page for 'LineBot-basic'. The repository is public and has 2 forks and 1 star. It contains several files: 'old', 'CreateYourLineBot.pdf', 'LineBot.py', 'README.md', 'config.py', and 'example.py'. The 'example.py' file is highlighted with a red box. The repository has 7 watchers and 2 forks. The 'About' section indicates no description, website, or topics provided. The 'Code' button is highlighted in green.

1. Find the required files from github:
<https://github.com/loTtalk/LineBot-basic>

2. Install the required Python modules:
Python modules *line-bot-sdk* and *flask* are required.
`pip install line-bot-sdk Flask`

32

Download the ngrok client.

ngrok requires you to log in and add your Authtoken once before use.

Go to <https://dashboard.ngrok.com/login>

Then run:

ngrok config add-authtoken <Authtoken>

This command saves the Authtoken to your computer.

The screenshot shows the ngrok dashboard with the URL <https://dashboard.ngrok.com/get-started/your-authtoken>. The left sidebar has a 'Getting Started' section with links like 'Setup & Installation' and 'Your Authtoken' (which is highlighted with a red circle). The main content area is titled 'Your Authtoken' and contains instructions: 'Use this personal Authtoken to authenticate ngrok agents, SDKs, and the Kubernetes Operator for your own projects. Keep it secret, like a password.' Below this is a large text field showing a long string of characters (the Authtoken), with a 'Copy' button to its right (also circled in red). Further down, there's a section for 'Service Users' and a 'Command Line' section with a 'Show Authtoken' link. The bottom right corner of the slide indicates the page number '34'.

In the command line, use the cmd below to activate ngrok:

ngrok http 32768

```
C:\選取 命令提示字元 - ngrok http 32768
ngrok
Call internal services from your gateway: https://ngrok.com/r/http-request
Session Status          online
  Account                jyneda (Plan: Free)

**Check the state again.
The state of Auto-reply should be "Disabled".**

Test your LineBot application:

Step 1. Send any message using the Line app in your smartphone.

Step 2. Check the console output of example.py to see whether it responds with the message you sent.

Step 3. If Step 2 works correctly, close example.py and restart it.

Then check whether the startup message appears on your Line app.
